503-925-0125

CCB# 125208

- Make sure gutter & downspouts are clear.
- Clean out all the debris in your roof valleys.
- Check to make sure your pipe flashings and can vents are not cracked.
- Put styrofoam covers over your hose spigots.
- Turn off external water sources.
- Chalk any windows that are drafty.
- Check all door (including house and garage) gaskets to make sure they're working right.
- Clean all vents and filters for your heating and furnace systems.
- Look for any underground drainage issues.
- Check your chimney flue and make sure it's thoroughly clean out.
- Test your carbon dioxide detectors to ensure they're working right.
- Take note of any painting issues and start planning for next year.
- Check your dryer vents to make sure all the lint is cleaning out.
- Plug your foundation vents with styrofoam.
